

ALC contact,

We have received a note from Dr. Thomas Schenkel from Lawrence Berkeley National Labs in the USA expressing an interest for closer collaborations with stakeholders from the ALC. I attach his note below.

In my opinion the shortest and most productive way to establish if there are interest is for you to contact him directly via their website to determine if you have an interest in collaboration. If you do see an opportunity, you are most welcome to contact us to discuss further.

*"Hello,*

*I am reaching out from LaserNetUS (<https://www.lasernetus.org/>), a network of laser facilities that has been set up recently in the US. Following initial calls for proposals, we have now run a series of experiments with users. I am reaching out to the ALC to suggest that we connect and discuss areas of potential joint interest, including access to facilities, exchange of students and visits by scientist active in laser science and applications. Please let me know if you are interested in this conversation.*

*best regards,*

*-Thomas Schenkel*

*Director, Accelerator Technology and Applied Physics Division  
Lawrence Berkeley National Laboratory, Berkeley, CA, USA"*
